CERTIFICATE OF ATTENDANCE

Cahit Gerçekel

has participated in the
Green City Hackathon – Data for the Heilbronn of Tomorrow (Ages 16+)
(30,00 UE) from 27.10.2026 to 29.10.2026.

The Green City Hackathon was part of Green City Heilbronn, a collaborative project by Arkadia, re:edu and aim. The initiative collects and visualises environmental data with residents to help shape the city. During the hackathon, participants built on this work and developed ideas based on real data and challenges from Heilbronn. The hackathon covered the following activities:

- Joint identification of urban challenges and opportunities through data
- Development of project concepts for a sustainable and liveable city
- Collaborative planning and design of data-driven solutions
- Joint selection of suitable data, methods and tools for implementation
- Development and refinement of prototypes within project teams
- Presentation and discussion of team results and exchange of feedback
- Collective contribution to Green City Heilbronn through citizen science

Heilbronn, 29.10.2026
